APSS Hi-Fi Prototype Usability Questionnaire

Part A: Quantitative Data Capture

N0.	User Task	Rating [1-10]	Lecture Concept Test
1	Find the "Needle Exchange" information using the top navigation menu.		Discoverability
2	Locate the "Current and upcoming events" section on the Home Page.		Gestalt
3	Find the "About Us" section to read when apss started operating.		Understandability
4	Find the button to Volunteer or Donate in the "Get Involved" section.		Gulf of Execution
5	Click the social icons to view the social media of the organization.		Constraints
6	Did the main links in the top menu prevent you from getting lost?		Constraints
7	Navigate to "Research & Impact" to find scientific journals or reports.		Gulf of Evaluation
8	Rate the overall experience on how easy it was to find the information on the website.		Overall Usability

Part B: Qualitative Data Capture

No.	Open Ended Question	Key Interaction Tested
1	When you first opened the Home Page, what was the first thing you noticed? Did it look welcoming?	First Impression
2	Did you find any buttons or links confusing? If yes, which ones and why?	Gulf of Execution
3	After clicking a link, did you find exactly what you were looking for? Why or why not?	Gulf of Evaluation
4	Our client's old website had "broken hotlinks." Do you think this new design fixes that problem?	Pain Feelings (Empathy Map)
5	Did having few navigation bars in the top menu help you focus, or did you feel like something was missing?	Constraints
6	Our client wanted an "engaging and interactive" website. Did this prototype feel interactive to you? What specific feature made it feel that way?	Gain Feelings (Empathy Map)
7	Was it obvious to you that you could find research section to view apss research work?	Affordances
8	If you could change just ONE thing about this website to make it easier for users, what would it be?	Overall Feedback
